About You

(words&music BootUpSound)

I can't make it right when I don't understand
My heart in the clouds. My head back in my hands

I was foolin' around on the outside
Making light of things I should know
I was fooling around on the outside
An' I see I was hurting you too

Turning me upside down
Tearing up everything I held to be dear
All I hope is that now
Everything is so clear

I can't make it right when I don't understand
My heart in the clouds. My head back in my hands

Turning me upside down
Tearing up everything I held to be dear
An' I was hurting you too
An' I was hurting you too

Ooh You too
Ah You

When it came clear in my mind
I had nothing left to lose
Except you by my side
So my desire was that all of my fantasy
Came true. Ever you, ever you

You take again, take again
Didn't make it right
It's gonna break again
Break again. Break and break it right
So you
Take again, take again
Didn't make it right
It's gonna break again
Break again. Break and break it right

I can't make it right when I don't understand
My heart in the clouds. My head back in my hands

Turning me upside down
Tearing up everything I held to be dear
And everything is so clear
And everything is so clear
An' everything is so clear

About you
